

DIRECTIONS—Answer the following questions about your virtual salmon dissection in your own handwriting on a separate sheet of paper...

- 1). How many fins does a salmon have (don't forget the other side)?
- 2). Estimate how many eggs a female salmon can carry.
- 3). Where are they found?
- 4). What part of the fish needs to be cut to get to the eggs?
- 5) What color is the liver?
- 6) Where in the fish is it found?
- 7) What are three other organs found next to the liver?
- 8) What are the next three organs you dissect out?
- 9) Which one of the above organs looks like a crab?
- 10) What did you put into the swim bladder?
- 11) Where did you find the kidney in the fish?
- 12) Now that you are done, use the internet to describe the function of each organ below (Answers must be specific)

- a. Heart
- b. Intestine
- c. Kidney
- d. Liver
- e. Stomach
- f. Pectoral fin
- g. Pelvic fin
- h. Caudal fin
- i. eggs
